

# EnzActive

---

high-efficiency microbial probiotic  
feed supplement based on yeast  
**Saccharomyces cerevisiae** of the  
specially designated and deposited  
YAF 338 strain

### Composition

100% pure yeast culture  
*Saccharomyces cerevisiae*

### Uniqueness

probiotic, enzymatic,  
metabolic, with the  
preservation of high  
product activity

### Versatility

works effectively with  
different types of diets  
for all productive  
animals and poultry

### Compatibility with acids

Resistant at pH 2.5 or higher  
(compatible with organic  
acids)

### Resistance

Yeast culture *Saccharomyces  
cerevisiae* is resistant to  
antibiotics

### Thermostability

Up to 85° C  
(withstands granulation,  
expansion)

**1** improves profitability of an enterprise  
and its zootechnical indicators

**2** a reliable alternative to in-feed  
antibiotics

**3** natural solution to the improvement  
of feed efficiency

**4** helps to increase production  
efficiency and nutritional value of  
livestock and poultry products

**5** promotes the support of animals  
during stressful periods: diet change,  
transportation, temperature  
fluctuations, etc.
